

This is a ***static text*** element containing styled text. **Styled text** elements are introduced by setting the *isStyledText* boolean attribute available for the **textElement** tag to *true* and by formatting the text content using nested **style** tags and simple HTML tags.

This is a text field element that contains styled text displaying the text-only version of the ^JasperReports logo.

Here is the list with the attributes supported by the **style** tag used to format the text content inside a styled text element:

- fontName
- size
- isBold
- isItalic*
- isUnderline
- ~~isStrikeThrough~~
- pdfFontName
- pdfEncoding
- isPdfEmbedded
- forecolor
- backcolor

Here is the list with the supported HTML tags :

bold
italic
underlined
an empty line follows(
):

A bulleted list:
